Key Skills

- PHP
- Laravel
- JavaScript, jQuery
- Bootstrap
- Database (MySQL)
- API
- CSS
- HTML

Project Experiences

You can see my projects on Github.

POS system for selling Plants

This project is about a point of sale system which sells Terrarium plants. The website is built with **Laravel 11** and include both admin and user panel. For the user interface design, I used a customizable template provided by CodeLab Myanmar.

Provided Link: https://github.com/hnitoomay/terra-lab-POS

Food ordering system for a restaurant

A dynamic food ordering platform built with **Laravel 9**, designed for managing food menu, order, user detail in retail environments. The web-based platform includes both admin panel and customer panel.

Provided Link: https://github.com/hnitoomay/POS-system

Social Media Campaign

A dynamic website built with **PHP** that include contents to provide help and support to teenagers to encourage them to stay safe when using social media apps.

Provided Link: https://github.com/hnitoomay/SocialMedia-Campaign-

Retail Camping Company

This is the first project that I had ever built with pure HTML and CSS. The website includes menu bar, product catalog, showcasing camping furniture, animation slider, add to cart page, and footer.
